Command – Comma (,) This is one of the least-known keyboard commands on a Mac, but it's super useful.. There's also a keyboard shortcut — select an item (you can even use the Up and Down arrows to navigate to it in Finder view) and then press Command-Y.. Command-Space The combination that can change your life, Command-Space invokes Spotlight, just depress these keys and start typing your query.. I'm sure most Mac users know Command-C means copy and Command-V means paste, but there's a host of other useful shortcuts that make a Mac user's life much easier.. You can navigate to the Menu bar if you like and scroll through to access the Preferences. [Eplan For Mac](#)

The next group of keyboard shortcuts allow for quickly highlighting and selecting elements of text: Select text to beginning of a line – Shift+Command+Left Arrow Select text to end of a line – Shift+Command+Right Arrow.. Command-Tab Open application switcher, keeping Command pressed, use Tab to navigate to the app you hope to use.. Mac keyboard shortcuts By pressing certain key combinations, you can do things that normally need a mouse, trackpad, or other input device.. [] Command-M Press this combination to minimize the front app window to Dock, or press Command-Option-M to minimize all the windows belonging to the front app.. (I guess you know about Command-tab already?) Command-L The fastest way to make a search or navigate to a Website in Safari, Command-L instantly selects the address bar: start typing your query, and select the appropriate choice using the up/down arrows on the keyboard.. To use QuickLook, select an item in Finder, press the Space bar and a preview will appear.. It works like this: You are working in an app, and you want to open the application's Preferences.. Command-Shift-A Select this combination when in Finder/Desktop view to get to your Applications folder, or replace the A with U to open your Utilities folder in a new Finder window (or D for Desktop, H for Home or I to access iCloud Drive).. Or you can simply press Command-, (comma) to get to them in the fastest possible time.. I've assembled this short collection to illustrate this truth: Command-W Closes the active window you are currently in. cea114251b [Unduh Aplikasi Android Gratis Coc Berbayar Jadi Di Pc](#)
